

TREE LABEL

Hanging tags - set of 10

If you consider yourself an amateur gardener with many plants, Tree Label can help you keep track of your various plantings. These labels are designed to clip around the stems or small branches of your plants and shrubs. Be sure to write the plant's name before attaching the label.

Benefits

Hanging labels equipped with a small strap to tie around a branch. They help identify each plant, especially young shoots that are difficult to distinguish. You can also write additional information such as the variety name or planting date, making it easier to identify them.

Characteristics

Label length: 10.7 cm. Color: Yellow. Available with or without a permanent marker. Packaged in bags of 40 units.
