

NORTENE®

NETSOL

An ecological alternative to chemical weed control before growing

If you want to avoid the chore of weeding in the spring, use NETSOL winter mulch which allows cultivation on already clear soil. 100% waterproof, opaque with eyelets every metre and supplied with 12 serrated nails, it is easy to put in place. UV protection guarantee, reusable for more than 5 winters.

Benefits

An ecological alternative to chemical weed control before cultivation. Prevents the leaching of uncultivated soils. Maintains soil clear, weed-free. Warms the soil before cultivation. Laid after sprouting.

Characteristics

Co-extruded polyethylene tarp. Black. 90 g/m². With finishing hem along the entire edge. Eyelets every metre. Supplied with 12 serrated plastic securing nails. UV protection guarantee. Reusable for more than 5 winters.
